

QUOTEME - Android Application
created by: Mark Evans

CURRENT STATUS:

Application should compile and you will have a semi-functional application.

WORKING FEATURES:

- ActionBar created for all views.
- Each View created and styled.
- API created via service.
- Created Grid-View for Saved View.
- Created List-View for Search View.

TODO:

- Connectivity and Fail-proof validation throughout app.
- Finish saved functionality.
- Finish ActionBar functionality for all views.
- Start Share functionality for all views.
- Start Facebook, Twitter, Email implementation.
- Add Parse.com implementation.
- Finish Grid-View for Saved View.
- Create Widget with Random Quote.

USE GUIDELINES:

Compile using Android Emulator or Android phone. User must use Android(API 16) 4.2.1 or higher.

SPECIAL INSTRUCTIONS:

Download QuoteME beta 1.0:
